

The Stillaguamish Tribe is requesting proposals for a Design/Build of a 20x30 building with 10x30 covered lean to. The building will be used for processing fish and game for the use by Tribal members. There will be a walk in cooler with a floor drain. The building needs to be water proof with a concrete floor to allow pressure washing and slope to floor drains and a hose bib inside and outside in lean to area. It will need a roll up locking door to allow a truck to back in and a side entrance door with security access. The building will need to be climate controlled to keep cool and prevent freezing. Good lighting will be required inside and out and a backup generator. There will also be residential type freezers in the building. A stainless steel sink with hot and cold running water and stainless steel counters on wheels or carts that are easily movable. A pulley and track system to hang and move meat to the cooler and storage shelves for totes of tools and equipment.

Proposals will be due March 22nd, 2021 by 1pm at the Stillaguamish Tribe Administration building at 3322 236th St NE, Arlington, WA 98223. Or by email to ckirk@stillaguamish.com 360-572-3026
